*Small Fire, after Asakusa Imado*, 2011, ink and emulsion on ledger paper
© Edward Allington

Professor Edward Allington, Head of Graduate Sculpture at the Slade School of Fine Art, will present a series of drawings of trees, small fires and Japanese joints. Some are based upon the famous screen by Kano Eitoku (1543 – 1590), *Cypress Trees*, now in the Tokyo National Museum, some from other Japanese prints, some from observation, and others from comic books and a children’s guide to Japanese carpentry.

Drawing has always been important to Allington. He collects volumes of ledgers, once used by companies for their financial records. Most are leather-bound and on extremely high quality paper. The entries, some faded, are in neat and formal manuscript. Allington draws over the rows of figures and texts, which add a layer of their own history to his ideas for sculpture or sculptural diagrams. Allington says, “Sometimes the information on the paper gives me ideas as to how the drawing might develop. But the main reason [I use ledger paper] is because these are records of everyday life. I want there to be a contradiction between my illusionistic style of drawing and the paper. If you read the writing on the paper, you have to ignore the drawing, and if you want to read the drawing, you have to ignore the writing.”

---

**Notes for Editors**

- **Professor Edward Allington** was born in 1951 in Troutbeck Bridge, Cumbria. He studied at Lancaster College of Art, Central Saint Martin’s School of Art and Design, and the Royal College of Art. Allington came to prominence in the early 1980s when his work was included in influential group exhibitions such as *Objects and Sculpture* at the Institute of Contemporary Arts (1981) and *The Sculpture Show* at the Hayward Gallery (1983). Since then he has exhibited widely in America, Japan and throughout Europe, and is represented in major national and international collections such as the Tate Gallery and Victoria and Albert Museum in the UK, and the Aichi Prefectural Museum in Japan. He was a Sargent Fellow at the British School in Rome (1997) and a Gregory Fellow in Sculpture at the University of Leeds (1991-93). He is a regular contributor to art magazines such as *Frieze*, and a book of his collected essays, *A Method for Sorting Cows*, was published in 1997. Allington is Head of Graduate Sculpture at the Slade School of Fine Art, University College London.

- **The Daiwa Anglo-Japanese Foundation** is a UK charity supporting links between Britain and Japan. It carries out its work through three main activities: awarding scholarships; giving grants to individuals and institutional partners to encourage UK-Japan collaboration; and organising a series of seminars, book launches and exhibitions at the Foundation’s headquarters in central London. The Foundation has provided substantial support for the arts in both countries since its inception, supporting exhibitions, artist-in-residence schemes, tours, education programmes and the Daiwa Foundation Art Prize. 957 Japanese small tree products are offered for sale by suppliers on Alibaba.com, of which artificial plants account for 5%, bonsai accounts for 1%, and aquatic plants accounts for 1%. A wide variety of Japanese small tree options are available to you, such as plastic, fiberglass, and wood. You can also choose from Christmas Japanese small tree, as well as from trees Japanese small tree, and whether Japanese small tree is decorative flowers & wreaths, or Christmas decoration supplies. There are 157 suppliers who sell Japanese small tree on Alibaba.com, mainly located in Asia. The top country is China, with 127 suppliers. Discover 20 of the best trees to grow in small gardens, including trees for fruit, flowers and foliage from the experts at BBC Gardeners' World Magazine. There are lots of small, slow-growing Japanese maples (Acer palmatum) to grow that won’t overcrowd your garden in a hurry. The foliage provides blazing autumn colour and grows in an attractive shape. Grow them in a sheltered spot, out of direct sun, or try them in a large tub. Biscuit joints: A small ‘fish’ is used to help align an edge or butt joint when gluing. Domino joiner: A trademarked fish similar to a biscuit joiner, where a piece larger than a biscuit has some of the advantages of dowels, and some of the advantages of biscuits. Properties of wood. As tracheophytes, trees have lignified tissues which transport resources such as water, minerals and photosynthetic products up and down the plant. The Japanese and Chinese traditions in particular required the use of hundreds of types of joints.
