Learn Visual C++ through the Teach Yourself series, with sections on: Q&A, Do's and Don'ts, Workshop, Shaded syntax boxes, Type/Output/Analysis icons. Week One starts you with Visual C++. After installing and maneuvering through the components of the software, you'll examine a preliminary program to get the feel for C++ and Visual C++. You'll learn: C++ basics; hierarchies; members, functions, and objects; inheritance; MFC; installing Visual C++, the Visual C++ compiler. Question 2: Day 2 - When I try to add member variables, none of the controls are listed in the ClassWizard so I can't assign any member variables to any controls. Solution 2: You can go back to the application box and Right click on the controls and go to Properties. Change the Setting to match the text. Teaching yourself C in 21 days is like teaching yourself handgun safety in 2 minutes. The results of either are undefined, except C lacks a safety or decocking mechanism. In reality, it's going to take the better part of two years to achieve any kind of definition of proficient. You'll gain this by shooting yourself in the foot, repeatedly, while learning from a determination to tackle practical problems using C. It takes the better part of 9 months to discover blinking, while blinking is a very complex process, C is not always instinctual. share |.
